

Healthcare Informatics

A must know - for Hospital and IT staff

The advent of computers and sophisticated software in healthcare have helped make patient care safer and ensure delivery of quality based healthcare. This makes the IT staff at any health institution a critical resource. To keep pace with technology and reap its benefits in hospitals it has now become mandatory for clinical staff to have a foundation in Healthcare Informatics. In such a scenario, a lack of Healthcare Informatics skills becomes a big disadvantage. A good foundation in Healthcare Informatics is therefore a necessity for both the above groups, to make them capable and confident in such a scenario.

But where does one find the time for this....?

Vital for you

Fast track Workshops

Foundation Healthcare Informatics - 5 days

Standards and Standardizing Organizations

HL7 V2x – 3 days

HL7 V3 CDA – 3 days

Principles of Terminology LOINC, SNOMED-CT, ICD, CPT 1 or 2 days

ICD 9 to 10 migration – 2 or 3 days

Evidence-Based Medicine - ½ day

Electronic Health Records - 2 or 3 days

Practice Management Systems – 1 day

E-prescribing (CPOE) – 1 day

CDSS – 1 Day

HIMS/HIS – 2 days

US Healthcare and Insurance - 2 or 3 days

Personal Health Records - ½ day

Medical Imaging, PACS, RIS – 3 days

DICOM - 3 or 6 days

HIPAA – 3 days

mHealth – 1 day

Telehealth and Telemedicine - 1 or 2 days

Public Health Informatics - ½ day

Consumer Health Informatics - ½ day

We understand this perfectly and have tailored 'Fast Track', hands-on, class room based workshops on topics in Healthcare Informatics. These workshops are especially designed for the busy doctor, nurse and IT professional. Bottom line - we give them the confidence to understand and ultimately work on modern computerised Hospital systems and applications. The end result – improved quality of patient care.

Subjects include, Healthcare Informatics foundation, EHR, EMR, EPR, PHR, HIS, HIMS, CPOE, CDSS, HL7, MIRTH, DICOM, PACS, RIS, LIS, HIPAA, ICD9, ICD10, Hospital Waste Management, etc .

We have trained resources for top governmental organisations like C-DAC and Blue chip multinationals like Wipro, GE Healthcare, Hitachi, Cybage, Sasken, Deloitte, Clinical Solutions, UK, Crimsonlogic, Singapore to quote a few.

HCit Consultant (HCit) is an 8 year old entity that focuses on training, strategy and consultancy in the niche domain of Healthcare Informatics.
